1 Hand-E-Vac

Industrial Cleaning Gun for Vacuum or Blowoff

1.1 Overview

This low cost, versatile cleaning gun is a "must have" maintenance tool for everything from the largest factories to the small shop. The compressed air powered Hand-E-Vac is a fast and efficient vacuum or blowgun.

The Hand-E-Vac is a powerful, hand-held vacuum gun that's lightweight and easy to use. Its internal air amplifier converts the supplied compressed air into a strong suction that is regulated by an ergonomic trigger.

There's no more need to move an electric shop vacuum around and worry about shock hazards and motor burnout. Just keep a Hand-E-Vac at each machining area or workstation for safe, fast and convenient cleaning.

1.2 Benefits

- Powerful and economical to use
- Lightweight, ergonomic design
- Converts to blowgun in seconds
- Vacuum mechanism has no moving parts
- Uses no electricity - No shock hazard
- Trigger controlled airflow
- Optional wands, hose and tools

1.3 Applications

Dust, chips and debris can be ducted directly to a drum, recycling container, or to an optional shoulder bag. In seconds, the Hand-E-Vac converts to a blowgun by reversing the nozzle insert. Made of durable, impact-resistant nylon, the Hand-E-Vac's internal amplifier has no moving parts to break or wear out. Optional tools and accessories extend the Hand-E-Vac's adaptability to countless applications.

1.4 Uses

Use a Hand-E-Vac to clean up or convey numerous materials including:

- Metal chips
- Sawdust
- Shavings and scrap
- Rubber and plastic trim
- Styrofoam pellets
- Plastic media
- Absorbent material
- Lint and cloth scrap
- Powders
- Small parts
- Open and fill bags
